Language	Reading	Writing	Understanding	Speaking
Pashto	Fluent	Fluent	Fluent	Fluent
Dari	Excellent	Excellent	Excellent	Excellent
English	Excellent	Good	Good	Good
Urdu	Excellent	Good	Good	Good

## WORK EXPERIENCE

**1. Quran App Developer | Multi-Language Quran Translation App:** Developing a Quran application that provides translations in English, Pashto, and Dari. The app includes a built-in Tasbeeh feature for users to keep track of their dhikr and is continuously evolving to incorporate additional features, such as Hadith collections from various references.

- **Technologies Used:** React Native for cross-platform development, SQLite for local data storage, and planned integration of external APIs for Hadith references.
- **Key Features:**
  - Multi-language support for accessible Quranic study.
  - Offline functionality for translation and Tasbeeh features.
  - Ongoing development to enhance user experience with Hadith and other Islamic resources.

**2. Mobile App Developer | Tailor Shop Management App:** Designed and developed a comprehensive mobile application tailored for a tailor shop's management needs. The app streamlines operations by providing features like order tracking, customer management, inventory control, and appointment scheduling.

- **Technologies Used:** React Native for cross-platform development, integrated with SQLite for local data storage, and PHP for backend services.
- **Key Achievements:**
  - Improved shop efficiency by reducing manual paperwork and errors.
  - Enhanced customer satisfaction through timely updates and accurate order tracking.
